

Plant Invaders of Mid-Atlantic Natural Areas, Field Guide

Orders Due Wednesday, February 12, 2025

As the climate warms, global commerce expands, and habitat destruction continues, invasive species are becoming an increasing threat. This book is for people who want to learn about invasive plants, how to identify them, and what can be done to manage them. **Plant Invaders of Mid-Atlantic Natural Areas, Field Guide** provides photos and data on 92 invasive plants threatening our region, including species such as Asian jumpseed, mock strawberry, and two-spine water chestnut.

Ready to dive deeper into the growing invasive plant species problem? The online resources section is geared for experts, as well as those new to the field. The listings provide a comprehensive selection of publications, websites, and apps with information on the invasive plants you love to hate! You'll also find a write-up on the mid-Atlantic ecoregions in the introduction. The section on native plants for landscapes offers suggestions for species appropriate for your area.

This is a reprint of the 2022 edition because it flew off the shelves and is now out of stock. For

this edition, lead author and invasive species specialist Jil Swearingen of *In the Weeds Consulting* teams up with co-author and plant expert Judy Fulton of *EcoPlant Consulting*. Dr. Melanie Schori, Botanist for the USDA Agricultural Research Agency's Germplasm Resources Information Network, assisted with updates on plant names.

Books are available for bulk purchase by the box (50/box). The price per box is \$175 (which comes to \$3.50 per book), plus shipping & handling. **To place your order, complete the online form by midnight on Wednesday, February 12, 2025** (https://docs.google.com/forms/d/e/1FAIpQLSdIliO-ecoHfH4d62gkhPgXlUmQshdNU_02Lt9ugDRH7i2cxRw/viewform?vc=0&c=0&w=1&flr=0).
